# We Are Family

MF Design Studio - Bali was created by the talented sibling, Miar and Fajar who have a different specialty. Miar was graduated successfully in Architecture from Petra University and Fajar completed his bachelor degree majoring in Civil Engineering from Trisakti University.

With their different knowledge and each experience, they built interior design company in Bali by approaching the family concept as their main business strategy. This family concept is not only based on their relationship as a sibling but also consider their team and clients as their own family.

With over 200 projects in more than 10 years, we've developed more in our design and our execution. We believe that a great designs have to be executed well.

# Material Specialist Support

We believe that all good design comes with the right choice of materials. We own a family business retail material shop and distribution of some selected brands like light weight bricks and tiles. We've been in the industry for over than 30 years.

With the combine of our taste of design and the knowledge of materials we believe we can give the best solution budget wisely design for every projects.

# Development Projects

For over than 10 Years of experience in the hospitality projects, we able to gain our experience from our clients, most of our clients becoming our friends and they shared their knowledge about the business.

In 2017 we bought, design and build our first property of 27 rooms for minimalist motel concept in Denpasar City. And by the end 2019 we finished another 17 minimalist tiny house concept in Bumbak - Canggu.
